How to Score a Target

Step 1: Make sure the name, date, and position are on the target.
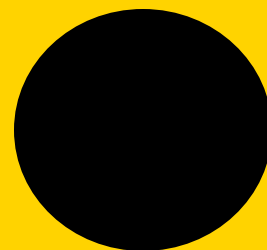

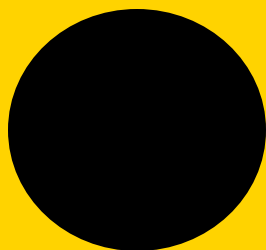

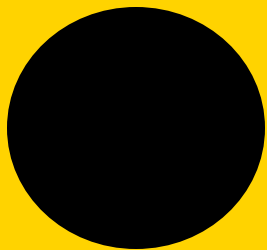

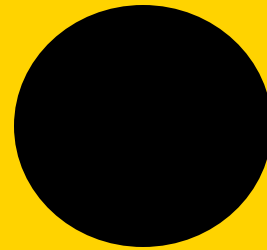

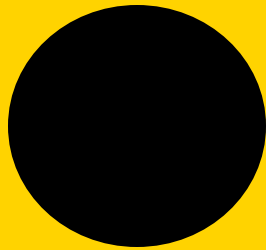

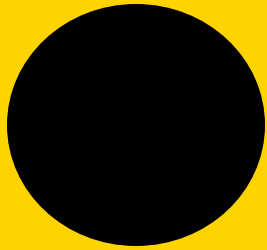

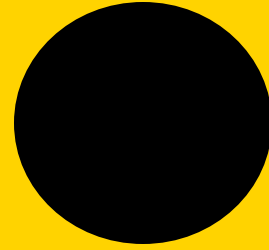

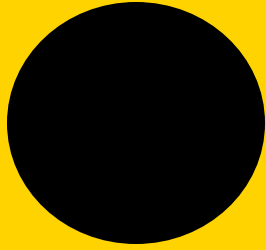

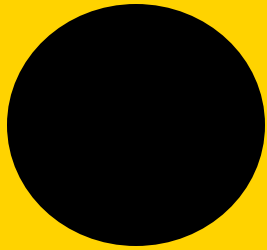

Step 2: Start scoring here and continue.

Step 3:
The scores are right on the target. If the pellet breaks the most inner line it is a 9. If the pellet blocks the white dot it is a 10. If the pellet brakes the line it is the higher score.
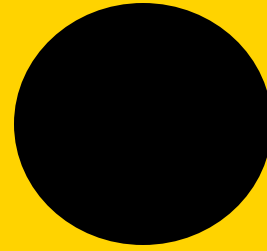

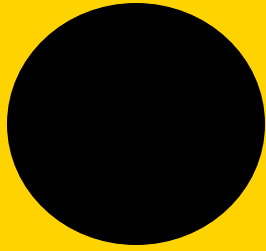

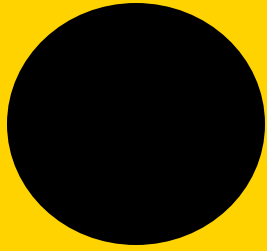

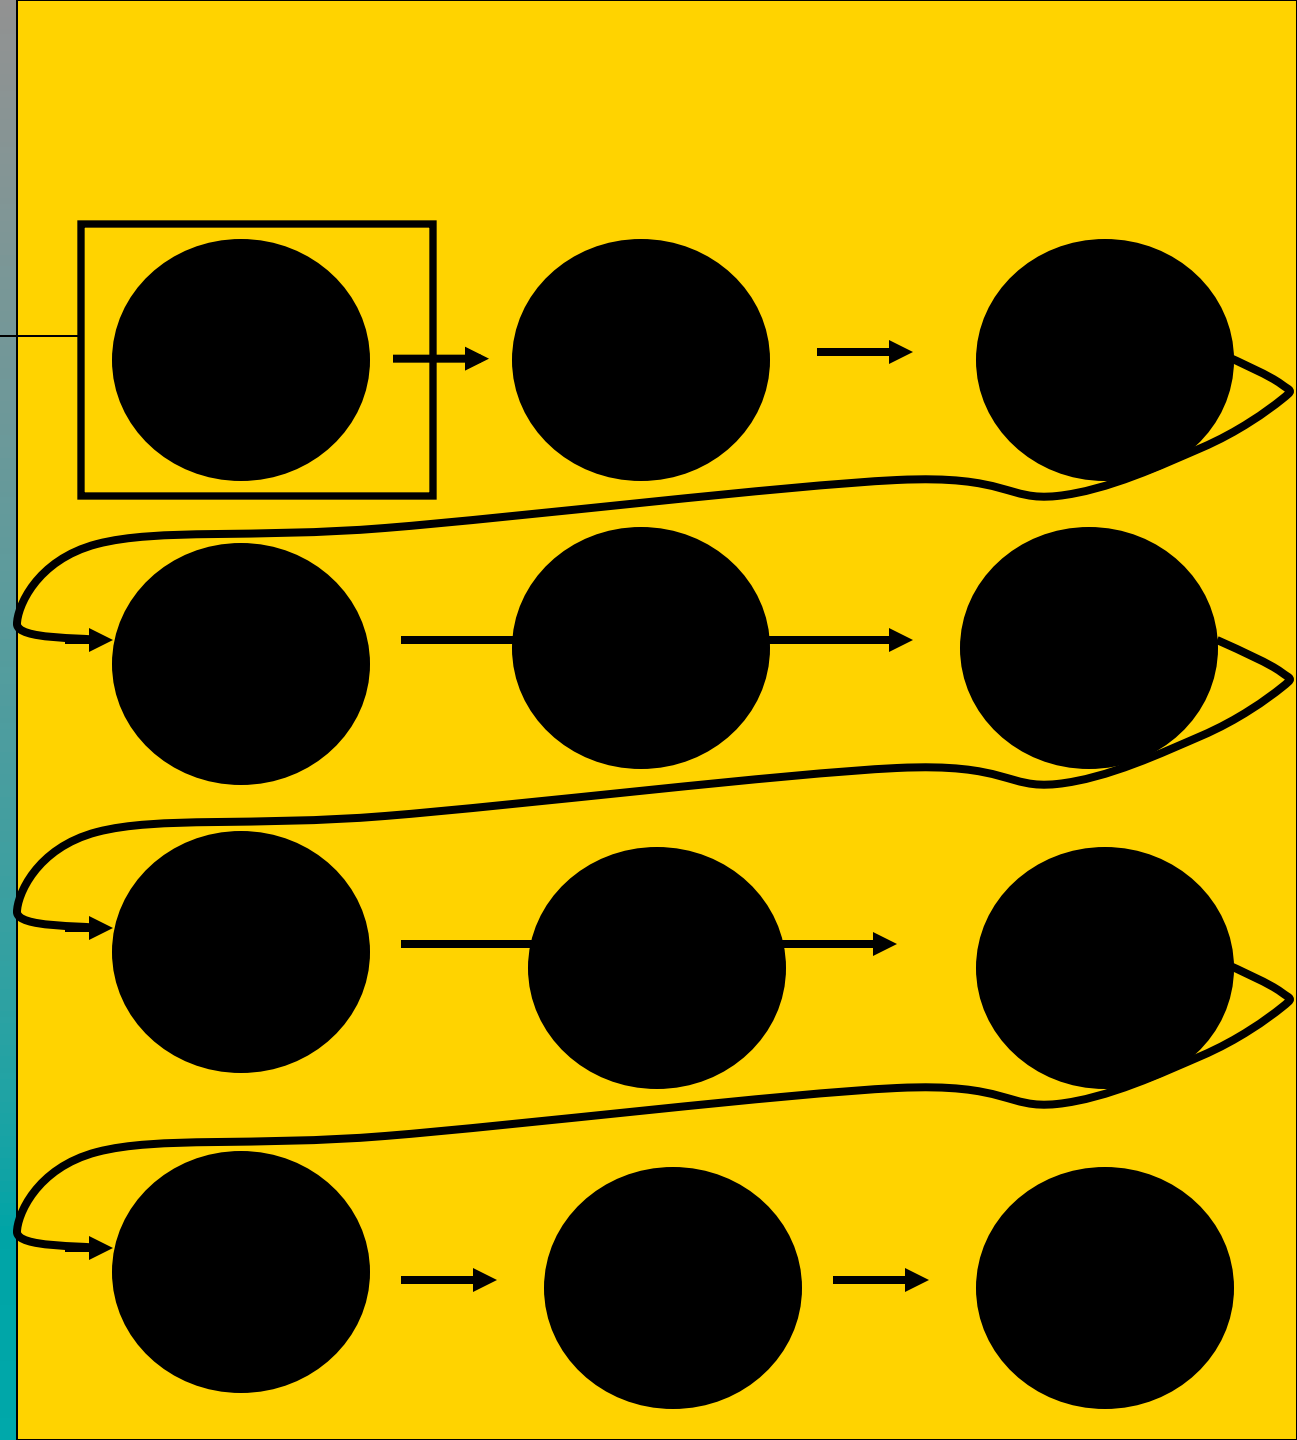

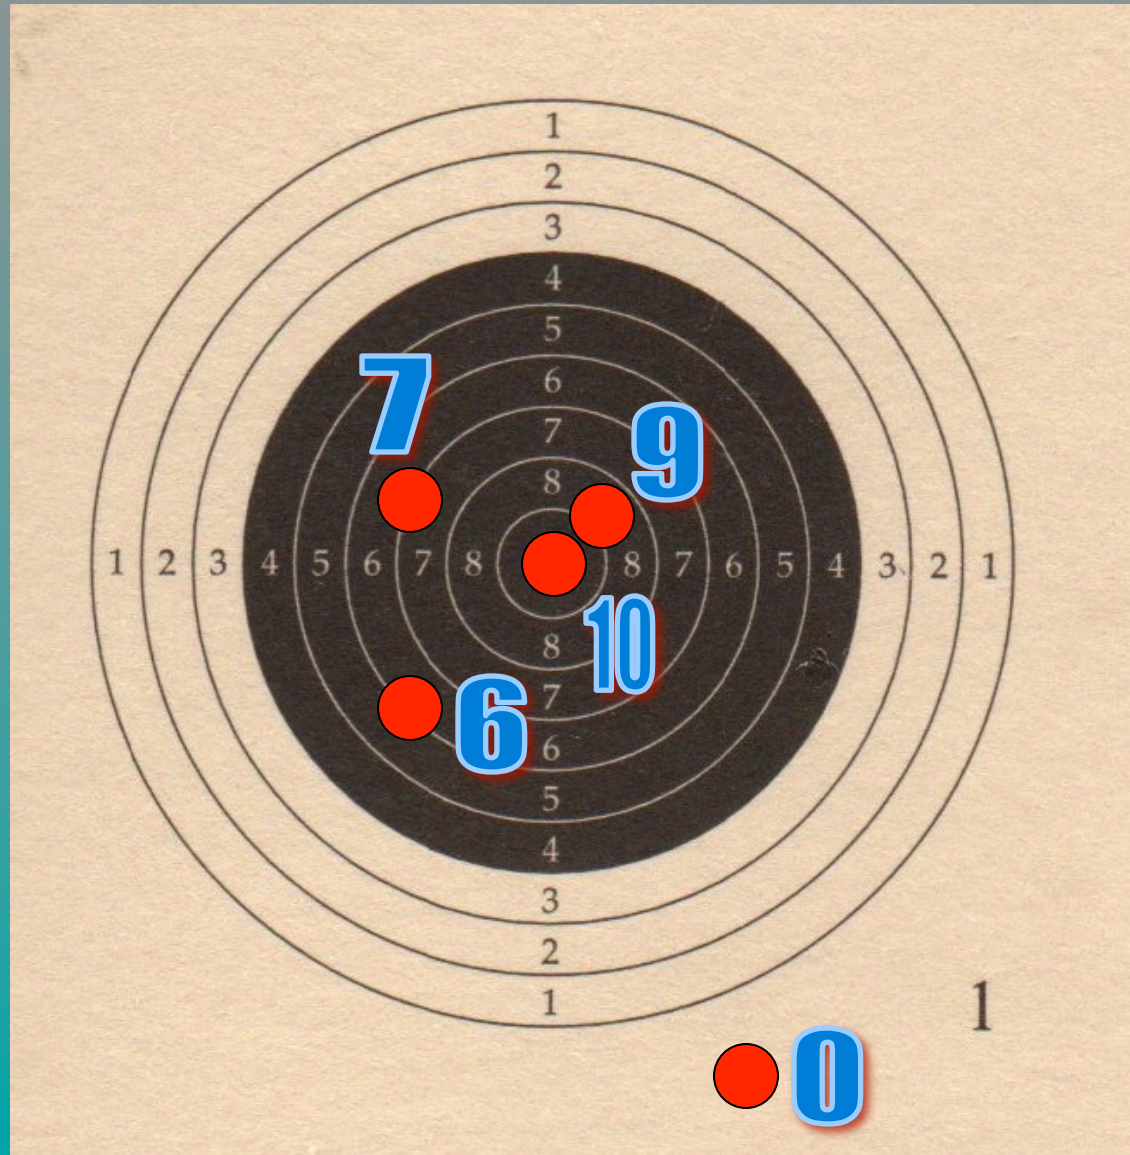

-If you see a lead print (or a distinct circle) but the paper is ripped you score the print.

Step 4:
Add up all the scores and circle the total.

Step 5:
Put the target in the shooters book.
